*P.O. Box 69  
Porum, Oklahoma 74455  
(918)484-5125*

Porum Public Works Authority will install a construction/pasture/yard tap at

---

prior to having an approved septic system in place. Any wastewater will be self-contained; none will be discharged at this site. This temporary arrangement will expire\_\_\_\_\_. At that time, an approved septic system will have been installed in accordance with the requirements of the Oklahoma State Department of Health or the water service will be DISCONNECTED; however, the responsibility for the monthly payments will not cease.

Setting the meter is being done as a courtesy to the member and in no way is it an attempt to avoid installing an approved sewage system.

Porum Public Works Authority reserves the right to come onto the property and conduct inspections at any time should there be a complaint about wastewater.

I understand that these are the provisions of the Porum Public Works Authority permit from the Oklahoma State Department of Health and that violation of these provisions is grounds for automatic discontinuance of water service from the Porum Public Works Authority and for enforcement proceedings by the county health department for abatement.

I have read the above and agree to these stipulations.
